Asphalt Express LLC

Website Update Instructions

For the website developer

Website: asphaltexpressllc.com
Hosting: your choice. Host on Vercel, or leave it on GoDaddy (Airo) if you can make these changes there.
Video: https://www.loom.com/share/256e24b8a2c340ada914f1ffaf11ef92

Part 1: Changes from the Loom video

[ ] **Watch the Loom video** from start to finish and make the changes it shows.

[ ] **Exception, please ignore this one:** the video says to change the home page heading "Michigan's Trusted Asphalt Paving Contractor" to "Southeast Michigan." **Do not make this change. Leave that heading exactly as it is.**

[ ] If anything else in the video is unclear, ask us before guessing.

Part 2: Front-end changes

[ ] **Scrolling announcement bar.** Add a scrolling (ticker-style) bar that loops continuously, styled like the one on the AAA Door site. Place it **directly above the stats bar** (the row showing 30+ Years in Business, 8 Asphalt Services, 40 Communities Served, 4.3 Google Reviews). The bar should scroll these messages: **Free Estimates** | **Residential and Commercial** | **Call (248) 889-5357** | **30+ Years in Business**. Make the phone number tap-to-call on mobile.

[ ] **Rolling numbers animation.** On the stats bar, make the numbers count up (roll) when the section scrolls into view, like on the AAA Door site. Apply it to 30+, 8, 40 and 4.3 (the Communities Served number should end at 42 after Part 3).

[ ] **Two new service area pages: Auburn Hills, MI** and **Milford, MI**. Build them the same way as the existing town pages (for example Novi and Highland): same layout and sections, with the content written for that town. Use the same style of web address, for example /auburn-hills-mi/ and /milford-mi/. Both are in Oakland County.

[ ] **Link the new pages in.** Add both to the Oakland County list on the Service Areas page and the home page, to the "Do we cover your town?" checker, and to the website sitemap. Update "40 communities" and "All 40 Service Areas" to 42 wherever it appears.

[ ] Keep the existing page web addresses, phone number, address and reviews unchanged.

Part 3: Check the contact forms

Please double-check that **every contact / free estimate form** on the website sends its messages to **asphaltexpresspaving7@gmail.com**, including the forms on the two new pages.

[ ]	Check the Contact page form, the home page form, and the estimate form on the town pages (for example Novi, Highland, Auburn Hills and Milford).
[ ]	Confirm the delivery address is asphaltexpresspaving7@gmail.com and no other address.
[ ]	Submit a test message from each form and confirm it arrives in that inbox. Also check the spam folder. If one fails, fix it and test again.

Before you finish

Preview the changes, publish, then check the home page and several town pages on the live site on both desktop and phone. Reply with a short note listing what you changed and the form test results.
